

GALLOWAY ELECTRICAL

Lanark BERTRAM HOUSE, CARNWATH

Case Study GE 02

Refurbishment of large country house, last used as office premises into 11 residential apartments by Clansman Homes.

Galloway Group were responsible for the Electrical and Ventilation installation for flats including door entry installation, communal TV/satellite installation, emergency lighting, smoke ventilation installation for communal areas.

The unknown factor associated with converting single use old building into new individual residential apartments meant that some alterations were necessary during the construction process as the fabric of the building was stripped back.

A number of visits during the Tendering process meant that we were fully aware of the vast majority of difficulties that we would encounter during the build and these were addressed prior to commencement of installation.
