

GALLOWAY ELECTRICAL

Elrick LEDDACH GRANGE

Case Study GE 03

Electrical and ventilation installation 78 new build flats and 10 communal stairwells for Bett Homes. Work also included door entry installation, communal TV/satellite installation, external lighting and emergency lighting for communal areas.

Various meetings with the clients in-house architect meant that we were able to propose and agree the selection of electrical fittings and luminaires that met with their Sales departments requirements. To overcome the small ceiling void and long ventilation duct runs, we were able to propose ventilation equipment and ducting which met building regulations and the aesthetic satisfaction of the client.

These meetings meant that we were able to ensure that the construction drawings were fully altered to the clients requirements prior to commencement of work.

We have successful completed all previous phases of this development dating back to 1999.

These phases were predominately private housing but also social housing for Grampian Housing Association.
