

# GALLOWAY ELECTRICAL

## Dundee CITY QUAY, PHASE 4

Case Study GE 06

Working for FM Developments, Galloway Group completed the electrical and ventilation installation for 53 new build apartments and 4 communal stairwells.

Additional works included door entry installation, communal TV/satellite installation, Fire alarm installation, containment and emergency lighting for communal areas.

The programme was quite compressed and partly ran concurrent with the previous phase.

Good communication with the client and with other trades, along with a site specific method of work and programmed procurement of material, meant that a quality product was installed, on time, to the client's requirements.
